- ★ Each Player's Controls Are:
  1 8-way Joystick
  2 Buttons: Action & Tag

Description:

Introducing in this corner the most realistic wrestling game yet—**The Main Event!** Step into the ring and prepare for hard-hitting wrestling action.

In **The Main Event**, players can choose their wrestlers from the following:

The Maui Mauler
Saturn Six
Bigfoot Joe
San Antonio Smasher
Conan the Great
Kamikaze Ken
El Condor
Alan the Empire

Just like in an actual match, after the wrestlers are chosen, the announcer introduces the teams and their combined weights. One member of each team then moves into the ring and the wrestling begins.

The player is able to use all the great wrestling moves—headlock, suplex, cheating, drop kick, camel clutch, cheating, figure 4 leg lock, more cheating, and many others! The announcer describes the different moves and the action occurring throughout the match. Player can pick his opponent up from the mat and bounce him off the ropes. He can also climb up on the ropes and jump onto his opponent. When the player has taken too much abuse, he can make the tag and have his partner take over.

When the ACTION button starts to flash, pandemonium breaks out. At this point, all players can join in the ring to help their partners out. The double team effort is not confined to the ring. Throw the rules out of the ring, along with the opponent. Chaos reigns outside the ring as players battle it out—pick up the chair and hit the opponents over the head. However, as in a real-life tag match, staying outside the ring too long will result in a double count out.

The match is over when the player successfully pins his opponent, is pinned, or runs out of energy. At the end of each match, a newspaper headline will flash the results of the match, and official Wrestling Federation rank. Fight fair? Only if you don't want to win!
